PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience designing, developing, and deploying scalable, high-performance backend systems using Core Java and Spring Boot. Strong expertise in RESTful API development, microservices architecture, multithreading, performance optimization, and database integration (MySQL, PostgreSQL, Oracle, Redis, MongoDB). Experienced in production deployments, CI/CD pipelines (Jenkins), Agile/Scrum methodologies, and troubleshooting high-traffic enterprise applications handling millions of daily requests.

TECHNICAL SKILLS

- Programming: Core Java, Multithreading, Collections, Exception Handling
- Frameworks: Spring Boot, Spring Core, Hibernate, RESTful APIs, Servlets
- Databases: MySQL, PostgreSQL, Oracle, Redis, MongoDB
- DevOps & Tools: Git, Jenkins, Swagger, Apache Tomcat, HAProxy, Log4j2, Shell Scripting, Crontab
- Architecture: Microservices, High Availability Systems, Load Balancing, Caching
- Methodologies: Agile, Scrum, CI/CD
- Generative AI Tools: GitHub Copilot, Cursor, ChatGPT

PROFESSIONAL EXPERIENCE

Software Engineer – Route Mobile Ltd (Proximus Global) | March 2024 – Present

- Developed high-performance Java backend systems for enterprise and telecom clients (LIC, ICICI, Jio, international telecom regulators).
- Designed scalable REST APIs handling 5–6 million requests per day with optimized multithreaded processing.
- Integrated Redis caching with MySQL and Oracle databases to reduce latency and improve throughput.
- Deployed and managed production applications using Apache Tomcat and HAProxy with load balancing.

- Performed root-cause analysis and production debugging, reducing downtime and improving system stability.
- Automated operational tasks using Shell scripting and Crontab.

KEY PROJECTS

- RcsJioSubmitter – Designed high-throughput RCS messaging backend handling millions of API calls daily with Redis caching and MySQL persistence.
- BulkSMS API – Developed enterprise messaging REST API with credit validation, routing logic, and telecom operator integrations (Jio, VI, Airtel, BSNL).
- Implemented fault tolerance, fallback routing mechanisms, connection pooling, and performance tuning.

EDUCATION

- PG-Diploma in Advanced Computing – MET-IIT, Mumbai (2024)
- Bachelor of Engineering – Zeal College of Engineering and Research, Pune

ACHIEVEMENTS

- Recognized with RCS Team Award for backend system contributions.
- Consistently rated as a high performer in annual evaluations.
